# 'P' MOUNTS

## APPLICATION

- For effective isolation of noise and vibration from rotating equipment with speeds of 1000 RPM and above
- Typically used to isolate fans, pumps, generators, air-conditioning units and general machinery

## FEATURES

- Static deflection ranges from 5-12mm
- Colour coded load range
- Threaded top
- Non-skid ribbed base

# COMBI-MOUNTS TYPE PC

POLYBOND COMBIMOUNTS PC are suitable for a wide variety of equipment. The COMBIMOUNT PC, is low profile, compact in size and ideal for mobile application due to added 'Fail Safe' feature. These mounts can be supplied with a height adjustment feature if required.

PART NO.	LOAD	DEFLECTION

When placing orders please specify 'Type I' (without height adjustment feature) or 'Type II' (with height adjustment feature)

# SANDWICH MOUNTS

SANDWICH mounts are designed to support heavy or sensitive equipment and isolate intermittent or continuous vibrations. These mounts can be loaded by compression of the two. The easy-to-install SANDWICH mounts result in longer service life, smoother operation and reduced maintenance.

# SPRING MOUNTINGS PSX & PSM

## APPLICATION

- Where an inexpensive spring hanger element is required for effective vibration isolation
- Typically used to support fans, pumps, compressors and packaged air-conditioners

## FEATURES

- Colour coded springs for visual identification of load range
- Heavy duty stable steel spring
- Bolt hole in base rubber isolated
- Bonded acoustic rubber pad on base type (PSX)
- Spring located by moulded rubber cup. Type (PSM)
- Built in levelling bolt and locking cap screw supplied with type PSM
- Fully weatherproofed

# MACHINE MOUNT TYPE PSN

## ADVANTAGES OF MACHINE MOUNT

- No foundation required, avoids expensive grouting
- Built-in levelling arrangement
- Quick installation of machinery
- Safeguards installed equipment from surroundings shocks and impacts
- Also absorbs shocks of installed equipment
- Re-arrangement of shop-Floor layout is now easy
- Keeps the machine in position firmly

POLYBOND MACHINE MOUNTS are especially suited for mounting workshop machinery without being anchored to the ground. These ready-to-install mounts allow the need for foundations or grouting. The height adjustment feature allows precise levelling of machinery. POLYBOND MACHINERY MOUNTS will provide excellent mobility of machinery layout in your workshop. These mounts will insulate high frequency vibrations and sound, and prevent wandering of machinery due to the large contact area.

Machine Mounts	PSN-1	PSN-2	PSN-3	PSN-4
OO	80mm	120mm	160mm	200mm
H	38-50mm	46-59mm	53-68mm	63-78mm

Load Range	50-500kg	200-1100kg	800-2100kg	1500-4000kg

# PAB MOUNTS

The fail safe design of this product allows the usage of these for both stationary as well as mobile applications. The horizontal stiffness is much higher than the vertical stiffness, hence these are used where there is a need to avoid the horizontal movement considerably (e.g. 'floating of machine tools')

Typically it is used for applications like motors, small generating sets, machine tools, eccentric presses. Textile machines, woodworking machines, ventilation system etc.

PART NO.	MAX LOAD (kg)	DEFLECTION AT MAX LOAD (mm)
PAB -1A	70	4.0
PAB-1B	105	4.0
PAB-1C	130	4.0
